### April - October 2024 Highlights

#### Consortium Meeting in Nicosia: A Productive Hybrid Gathering

On April 17-18, 2024, the DISCOVER consortium gathered in Nicosia, Cyprus, for a hybrid project meeting. Several participants joined online, allowing for broad participation across partner organizations.

The meeting began with each partner briefly presenting their organization and role in the project. This was followed by an overview from the Project Coordinator, who shared updates on work packages, project management, and financial procedures.

EUROTRAINING delivered a presentation on dissemination efforts and communication strategies, while UNIC (University of Nicosia) provided valuable insights into quality assurance and evaluation processes.

One of the key highlights of the meeting was the planning session on Work Package 2 (WP2): Digital Learning Strategy Toolkit and Ecosystem Mapping, where responsibilities were distributed among the partners.

#### Toolkit Ready! The Digital Learning Strategy Toolkit Is Now Available

Great news! The DISCOVER consortium has finalised the Digital Learning Strategy Toolkit and Ecosystem Mapping, a key result of Work Package 2.

The Toolkit is now available on the project website and includes:

- Ecosystem Mapping: Roles, dependencies, and collaboration mechanisms for digital learning in the Tunisian VET sector.
- Readiness Checklist: Covers planning, infrastructure, communication, online teaching, assessment, and digital competences of educators and learners.

This practical resource supports VET providers and policymakers in building digital capacity.

## Online Study Visit - Sharing Results and Building Digital Competences

On October 16-17, 2024, the DISCOVER consortium hosted an inspiring Online Study Visit, bringing together project partners and external participants for two days of engaging interaction.

The event featured a series of interactive workshops and hands-on activities focused on developing digital competences in the VET sector. Participants had the opportunity to explore digital tools, share insights, and engage in collaborative learning.

Additionally, the consortium presented key project results achieved so far, offering a comprehensive overview of the progress made in digital transformation and capacity-building across the Tunisian and EU VET landscape.
