February 2025 – November 2025 Highlights

The **DISCOVER project successfully completed** a two-year cycle of actions to **upgrade Vocational Education and Training in Tunisia**, drawing on the expertise of organizations from **Greece and Cyprus**. As part of the project, key educational tools were developed to **enhance the skills of VET providers and VET trainers**.

New Educational Tools & Resources

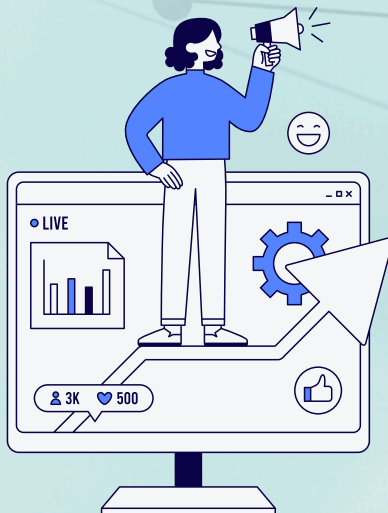

Developed and now available:

Curricula for VET Providers & VET Trainers

Two comprehensive 20-hour blended-learning programs, designed based on the needs of modern digital teaching.

The Master Trainers' Handbook

A practical handbook that guides trainers in creating a high-quality digital and blended learning environment.

The DISCOVER eLearning Platform

Available in English, French, and Arabic, it offers:

- ◆ the digital Toolkit & Ecosystem Mapping
- ◆ the curricula and Handbook
- ◆ e-learning tools and OERs
- ◆ a community of practice forum

DISCOVER Partners in Bizerte, Tunisia

The DISCOVER project was completed with the **Final Conference in Bizerte**, a particularly successful and dynamic meeting that **brought together 100 participants** from the fields of VET, education, innovation, and digital transition policies.

The event was the highpoint of two years of cooperation between Cyprus, Greece, and Tunisia and highlighted DISCOVER's role as a landmark for the digital transformation of vocational education.

The conference highlighted:

- progress in the digital learning strategy of VET organizations
- the results of targeted training courses
- the presentation of the Master Trainers' Handbook
- the operation of the eLearning platform as a permanent digital resource

The atmosphere of cooperation and active participation confirmed that DISCOVER was not just a project, but the beginning of an ongoing dialogue on the digital empowerment of the VET community in Tunisia and beyond.
