GREEN SHOOTS

Green Skills for VET Learning

Valencia Partner Meeting Highlights

ABOUT THE PROJECT

GREEN SHOOTS is a collaborative Erasmus+ initiative focused on equipping vocational educators and learners with the green and soft skills needed for the evolving labour market. Throughout the project, partners from seven European countries have developed and piloted a comprehensive professional development programme for vocational teachers, created an engaging e-learning platform featuring gamification, virtual reality, and simulation, and established validated competency profiles for green jobs.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Project number:
2023-1-ES01-KA220-VET-000158794

As the project enters its final stage, all core deliverables and training materials have been completed and successfully piloted to ensure their quality and relevance.

Valencia Partner Meeting

On 16 September 2025, project partners met in Valencia, Spain to discuss progress and finalise upcoming activities. They confirmed that the professional development programme, including guidelines and training handbooks, has been finalised and well received through piloting activities conducted earlier across partner countries.

The immersive online learning environment is fully operational, offering interactive digital resources to support green skills development in vocational education.

Partners are focused on disseminating these results widely and have begun holding multiplier events in partner countries aimed at promoting project take-up among vocational educators, business development organisations, and policy makers.

Administrative and quality assurance aspects were also reviewed, with all partners meeting their financial and reporting commitments while managing risks effectively.

The meeting reinforced the consortium's dedication to ensuring the GREEN SHOOTS materials are integrated sustainably into European vocational education and training systems.

NEXT STEPS

With the project scheduled to conclude in the end of September, partners are presently concentrating on completing final multiplier events. These events are designed to maximise awareness, facilitate adoption of the training resources, and secure long-term sustainability.

Ongoing support for educators and stakeholders will help maintain momentum in embedding green skills into vocational training beyond the project's lifetime.

PROJECT PARTNERS

We are proud to collaborate with:

- Fundación Pascual Tomás (Spain).
- Future in Perspective Limited (Ireland).
- Callidus Institution for Adult Education (Croatia).
- Exeo Lab Srl (Italy).
- CARDET (Cyprus).
- Skills Elevation FHB (Germany).
- Infinity Design Labs (France).

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.
