e-Protect – Newsletter 9

e-Protect e-learning platform is live

Are you working with the elderly and would like to help them safely use the internet and keep up with the digitalisation of the different services? We have now launched our e-learning platform, where you can register, browse, and find all you need to about internet safety, online commerce, e-payments and data protection.

e-learning platform design

The e-Protect Learning Space is designed to host content specifically related to the internet safety skills for the elderly. This content was developed for professionals working with the target group of elderly people (65+) or related institutions, policy makers, experts in the field of education, and researchers. The user interface is devised to support easy to navigate features, such as easy access to search and updates and simple navigation.

In brief, the e-learning space is a one-stop-shop providing instant access to the full suite of digital learning resources developed in this project. The rich informational material is freely available online for everyone interested in learning more about internet safety for the elderly.

Supporting functions

The e-Protect Learning Space is a multi-functional professionally designed digital space to support all aspects of the project implementation. The digital space aims to make all the deliverables of the project widely accessible. It also facilitates the exchange of good practice in the area and provide target groups and stakeholders with access to other relevant resources. Through the portal, interested parties are now able to get information on the project's material, upcoming events, and other related information in the context of the project. It was developed on cutting edge open-source technology to allow for low-cost maintenance.

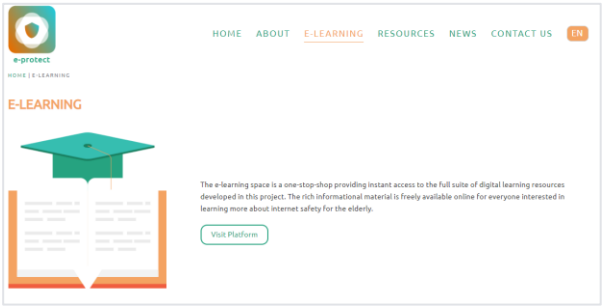

What can you find?

Users can access all material, guides, forum, and courses in four languages. The e-Protect e-Learning Space is available in English, French, German, Greek.

The main learning content of the digital space is:

- Competency Scale for consumer and data protection
- e-Protect Curricula for Internet Safety for the elderly
- e-Protect Train-the-Trainer Toolkit for adult educators

Access the e-learning platform here!
